

Representative Vell Placement

DR. ED BECKER
MEMBER OF THE BOARD OF DIRECTORS

Redlen Technologies announced the appointment of Dr. Edmund Becker to its board of directors. Becker retired as Chief Operating Officer of Analogic Corporation in 2008.

Dr. Becker has more than 40 years of executive and management experience in the high growth OEM medical products industry. From 2005 to 2008, Dr. Becker served as the executive vice president and chief operations officer at Analogic Corporation in Peabody, Massachusetts. Prior to that role, he was vice president/general manager of its OEM Medical Imaging Products Division, responsible for management of the organization that grew to become the largest and most profitable business unit in the Company. During his tenure at Analogic, Dr. Becker played a key role in the profitable growth of the company from \$10M to \$450M revenues. A graduate of the University of Chicago, Dr. Becker earned a BS in Physics and a PhD in Biophysics.

About Redlen Technologies

Redlen Technologies is a leading manufacturer of high resolution Cadmium Zinc Telluride (CZT) semiconductor radiation detectors which are enabling a new generation of high performance detection and imaging equipment including Nuclear Cardiology, CT Scanning, Baggage Scanning and Dirty Bomb Detection. Having successfully pioneered a breakthrough production process for manufacturing advanced CZT semiconductor wafers, Redlen is revolutionizing the performance, cost and availability of radiation detection and imaging – enabling the widespread adoption of this technology for the medical and security markets.
