

## Representative Vell Placement

**WILLIAM BERGEN**  
CTO / CIO

Frontline Technologies, the cloud-based K-12 software solution to 7,000 school districts, announced Bill Bergen, formerly VP Product Development, Talent Solutions at ADP, as its CTO. Bill responsible for all aspects of the company's technology including its software developers, architects, IT and infrastructure.

In addition to serving as the VP, Product Development at ADP, Bill also held the role of GM, Large Markets Benefits administration. He joined ADP via the highly successful acquisition of Workscape, in 2010, where he had been the company's Chief of Operations and CIO. Bill led key technology and business initiatives that have been central to its success. He successfully built a new technology platform leveraging the latest in Web 2.0 based capabilities, and was instrumental in introducing the Agile development methodology to produce feature rich, high quality products that can be very quickly adapted to meet the evolving needs of its customers.

Bill also led Workscape 's breakthrough development of new corporate standard multi-tenant product architecture that provides the platform for highly configurable applications utilizing commercially supported open source technologies. In addition, he continues to lead company-wide initiatives focused on constantly measuring, analyzing and improving the security, performance and scalability of Workscape data centers and corporate infrastructure.

Bill holds a Bachelor of Science degree in business management and management information systems from Stonehill College and has conducted his MBA studies at Clark University.

### **About Frontline Technologies**

Frontline Technologies provides cloud-based K-12 software that empowers over 7,000 school districts and millions of educators to positively impact student learning.
